## President's Message

T. Wayne Lankford

Our season has begun. Spring has finally sprung with the joyous sounds of sneezing, coughing, wheezing and watery itchy eyes. Not conducive with pursuing our favorite hobby and pastime but we must endure. Soon enough we will be complaining that it's too hot, too humid and wishing for cooler weather. Lets just have fun driving America's Sports Car, the Corvette.

The activities calendar has certainly filled up with a plethora of various events and gatherings to please the many interests of the club members. Several trips have been posted with the Watkins Glen trip rapidly approaching. Check the activities, sign up and have fun.

Our first cruise night was Saturday April 15<sup>th</sup> and it was a great success. Candy and Chris again have done a great job and we also thank the other club members who were helping. Henry, although he had difficulty counting cars due to his lack of enough toes and fingers, stated that we had about 150 cars. Next month bring friends Henry.

I hope everyone enjoyed last month's Gas Cap newsletter. We are trying to enhance the Gas Cap to make it far more interesting. It will contain many more informative articles, activity updates, pictures as well as informative dialogue from our sponsor, Bryner Chevrolet. Please let us know if you have any suggestions or ideas for our publication.

I must mention that the Cavalcade is just six weeks away as of this month's message and we are still looking for someone to take over as chair of the Cavalcade Committee. We certainly don't want people complaining if there isn't a Cavalcade next year. With over four hundred members, I hope that someone will step up to the plate. The committee is doing a great job and they just about ready for this year's event. Thank you Steve and the Committee!

We are very happy that our May speaker will be the one and only Don Lemek from our club. His topic, from what I have heard, may be about his addiction and no, it is not what you think. So come on out and support Don and enjoy his presentation.

Well folks, that's a wrap!

T. Wayne

## CCDV'S BREAKFAST AT O'GRADY'S RESTAURANT ON SUNDAY, APRIL 23<sup>rd</sup>

Twenty hungry Vettesters traveled deep into Montgomery County - to Souderton - for our monthly roving breakfast. It was a beautiful Spring morning: perfect for driving our favorite sports cars to any destination – or to no destination at all. We arrived and filled up a portion of O'Grady's parking lot with our shiny Corvettes. Inside we had our choice of either a breakfast buffet or ordering off the menu. The food was good, the bacon was plentiful, and the CCDV camaraderie was great! There were a lot of laughs, and everyone had a great time. The attendees were:

Jeff & Julie Kauf, Fran & Barry Hunsicker, Ed & Mary Ellen Scannapieco, Buzz and Laura Thomas, Ken & Debbie Stacy, Fran & Joanne Schmidt, Joan & Kevin Allen, T. Wayne & Pattie Lankford, Paul & Ginny Wydominic, Capt. Bob (a new member, and Johnny Bacon. The next CCDV roving breakfast will be held at the Warminster West Diner on Street Road on Saturday, May 13<sup>th</sup> at 9:30am.

# INTERIOR CLEANING

#06-00-89-029M: Interior Cleaning - Instrument Panel (IP), Hard or Plastic Surfaces, Seats, Carpet, Leather, Vinyl, Fabric Cleaner, Stain Remover, Restorer - Product Availability - (Mar 2, 2016)

Subject: Interior Cleaning – Instrument Panel (IP), Hard or Plastic Surfaces, Seats, Carpet, Leather, Vinyl, Fabric Cleaner, Stain Remover, Restorer — Product Availability

Models: 2006-2017 GM Passenger Cars and Trucks (EXCLUDES Cadillac DTS Platinum and Escalade Platinum with RPO R9N – Tehama Leather)

Attention: This Bulletin also applies to any of the above models that may be Export vehicles.

This Bulletin has been revised to add the 2017 Model Year. Please discard Corporate Bulletin Number 06-00-89-029L.

To keep the vehicle interior looking the best, it should be cleaned often. It is important to keep the upholstery from becoming heavily soiled. The vehicle's interior can experience extreme heat, which can cause stains to set quickly. Lighter color interiors may require more frequent cleaning. Care should be taken because newspapers and garments may transfer color to the vehicle's interior.

Many of today's interiors are made with new low gloss materials. Permanent damage may result from using cleaners on ANY surfaces (interior trim, instrument panel, carpet, leather, vinyl and fabric) for which they are not intended. Using non-approved products can actually set the stain to the point that nothing can remove it.

## Important:

- Do not use silicone or wax-based products or those containing organic solvents (such as naphtha, alcohol, etc.) to clean your vehicle's interior because they can alter the appearance by increasing the gloss in a non-uniform manner. The increase in gloss may cause annoying reflections in the windshield and even make it difficult to see through the windshield under certain conditions.
- Never use a STIFF brush or a brush that has been previously used with a harsh chemical. This can cause damage to the vehicle's interior surfaces.
- Use only mild, Neutral-pH cleaners. Avoid laundry detergents or dishwashing soaps with degreasers. Using too much soap will leave residue that leaves streaks and attracts dirt.

Because it is critical to use only mild, neutral-pH cleaners, General Motors has approved the use of the cleaners and conditioners listed in this bulletin for the cleaning of interiors. These products are in the neutral-pH range and will maintain the best vehicle interior appearance. These products are water-based, biodegradable, and do not contain bleach, solvents or harsh chemicals.

Interior trim pieces on new vehicles, as well as service components, arrive with a protective film. When removing the protective film, adhesive residue may be left on the trim panels/components. The cleaner (for leather, vinyl, plastic and interior paint) is an effective cleaner in removing adhesive residue without causing damage to the component.

## Important:

- Before any cleaning product is used, vacuum to remove all loose dirt.
- If soapy, alkaline cleaning solutions are used on fabrics, and not thoroughly rinsed out, the residual left in the fabric will attract dirt. Because the recommended cleaners/conditioners are in the pH neutral range, they won't leave behind soapy residue.
- On heavily stained or difficult to clean fabric/carpet, it is recommended that the entire surface be treated and cleaned vs. spot cleaning. Refer to Extractor Machine and Concentrate section of this

bulletin for more information.

**Effective cleaning steps for hard and/or plastic surfaces:**

1. Using a clean towel, apply/spray cleaner — leather, vinyl, plastic, interior paint, directly onto the towel.
2. Wipe the surface with the towel/cleaner.
3. If necessary, use a soft bristle brush to work cleaner into the crevasses of the area being cleaned.
4. Wipe off any excess cleaner from the surface.
5. Using a clean towel, apply/spray the conditioner (leather, vinyl restorer) directly onto the towel.
6. Wipe the conditioner onto the previously cleaned area to restore the material to its original luster.

**Important:** Today's interiors are developed and intended to have a low-gloss appearance. It is important to use only products which provide a low-gloss finish in order to maintain the interior's integrity, customer appeal and satisfaction.

**Effective cleaning steps for fabric:**

1. Remove any residue by lightly rubbing the surface with a clean towel.
2. Choose the appropriate stain remover based on the stain type.
3. Spray and lightly brush the area with a clean, soft bristle brush.
4. Gently blot up the stain.
5. On upholstery/carpet, the use of a fabric protector can help to reduce or eliminate future staining.

**Upholstery and Carpet Stains**

When cleaning upholstery and carpet stains ONLY, the following cleaning chart will help you determine which cleaner/formula works best on a particular stain. The chart lists many of the common stains. Some complex stains may require the application of both stain removers, one after the other, to remove both food-based oils and synthetic oils.

A soft bristle brush (P/N 88861425) should be used to safely work the cleaner into the leather grain or material. This enables the dirt/stain to be completely removed from the material.

### Leather Conditioner/Restorer

A Leather Conditioner/Restorer is also available. The restorer is safe for all vinyl and leather. It is a water-based product and contains essential emollients to restore suppleness, conditions and adds luster without adding gloss. The restorer will also provide protection against re-staining.

### Suede/Micro-Fiber Suede

Suede used on GMNA seats includes a fabric soil repellent already applied at the mill. There is no need for adding an aftermarket fabric protector of any type, and GM Materials Engineering does not recommend doing so. The best way to clean the suede is with water, or water plus a mild soap. Fabric cleaners, GM P/Ns 88861404 and 88861403, are available at dealerships and are also recommended for cleaning suede.

*Dye Transfer:* Dye transfer will happen any time a natural fiber like cotton, silk, wool, or suede comes into contact with leather. The lighter the leather color, the more quickly the dye transfer will appear. Leather should be cleaned on a regular basis so that the dirt and grime do not adversely affect the top coat of the leather. After cleaning the leather, it is important to treat the surface with the restorer.

### Extractor Machine and Concentrate

For difficult to clean materials or when cleaning a large area, the best results will be achieved when using an extractor machine and concentrate. General Motors offers the Ruby Extractor (P/N 627-CC-3000AU) through GM Tools and Equipment 1-800-GM-TOOLS, and has recently released a concentrate for use with the extractor machine. In Canada, the Ruby Extractor machine is available from GMCCA (P/N 88861441).

Whichever extractor machine is used, it should meet the minimum specifications of the Ruby Extractor:

#### Ruby Extractor Specifications:

- Pump PSI: 55
- Water Lift: 85"
- Hose Length: 10 ft

**Important:** The Ruby Extractor also comes with a 6 year Outer Body and 3 year Parts warranty.

*Extractor:* The Ruby Extractor machine was designed for automotive use and works effectively in the vehicle's interior. The narrow design of the vacuum head allows detail work in tight areas. The water pressure pump is reduced so the fabric surface is not wet more than is necessary. The dry time is greatly reduced due to less water on the fabric surface, the vacuum head making better contact with the surface and the significant water lift capability of the machine.

*Concentrate:* The concentrated extraction cleaner is engineered with lower pH levels to help remove alkaline buildup on fabrics. The concentrate should be mixed according to the instructions listed on the container. The available concentrate helps to break the stain down and then the stain is easily removed with less water. The concentrate used in the Ruby Extractor is slightly acidic to remove soap and alkalinity from the fabric surfaces left behind by using improper, soapy solutions. Dirt, grease and grime are more easily removed when the proper solution is used during the extraction process.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
